

## **Greenwired Workmanship Warranty**

Greenwired stands by our work. We offer a 10 year workmanship warranty, which means Greenwired will supply service and support for all workmanship-related issues related to the installation of your solar energy system.

All of the major components that Greenwired installs also come with a manufacturer warranty (most range from 10 - 25 years). For warranty issues related to the manufacturing of system components, Greenwired will service or replace the malfunctioning components. Under product manufacturer warranty, we will first attempt to bill the manufacturer for payment for the service and repairs hours. If the specific manufacturer's warranty does not cover labor Greenwired will bill the customer for service hours.

For more service or warranty-related information, don't hesitate to contact us.
